

Action by Missouri Clean Water Commission

Date of Action: September 7, 2005

Water Body:

Name: East Fork Tebo Creek
Classification: C
Identification #: 1282
Length of Segment: 12.0 miles
County (ies): Henry

Use Attainability Analysis (UAA) Finding(s):

A whole body contact (WBC) recreation Use Attainability Analysis (UAA) was submitted to the department by Tetra Tech at the request of the department on May 23, 2005. The UAA was submitted to evaluate Criterion #2 Natural, Ephemeral, Intermittent or Low-Flow Condition.

Review Committee Recommendation (RCR):

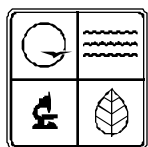

Committee Recommendation: ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
Information provided in the UAA led the UAA Review Committee to make a recommendation of "Modify Use." Specifically, they recommended splitting the segment into two subsegments. They recommended "Remove Use" for the upper portion due to reported lack of enough depth to support WBC recreation, and recommended "Retain Use" for the lower portion of the segment where reported increases in depth could support a WBC recreation use.

Summary of Comment(s):

(1) Two individuals report that they or their families swim there (or have in the past) and one also reported seeing others swim at two named locations. Two of those individuals reported that the creek runs through or near property owned by them or their family for decades. (2) Three individuals reported either personally fishing, wading, and floating the creek, or that their families or others did so. (3) One individual stated that the creek was too polluted by the City of Windsor to swim in it today. (4) Jackson receives drinking water from Truman Reservoir. Streams discharging into the basin should be protected. (5) UAA 0240: There was no discussion of the impact of algal growth, oil, and brown surface deposits on WBC recreation or what could be done to increase WBC recreation. No interviews were conducted. A study of at least one year is necessary.

Commission Action on Comment(s):

Commission Action: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
Because of comments received, the commission voted to retain the use designation of WBC recreation for the East Fork Tebo Creek in Henry County from Section 31, Township 43 North, Range 24 West (31,43N,24W) upstream to Section 35, Township 44 North, Range 24 West (35,44N,24W). The commission directed further investigation to determine specific locations and extent of recreational activities.
